What is this product?

TYPE OF PRODUCT

The product is a Sub-Fund of Lux Multimanager SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However, the Board of Directors of the Fund may decide to close the Fund under certain circumstances.

OBJECTIVES

Finserve Nordic AB manages the investments of this Sub-Fund.

The Sub-Fund's investment objective is to achieve appropriate income and the highest possible long-term value increase by investing within the defense and security sector (homeland and cyber security). The Sub-Fund will invest mainly in securities of companies without geographical restrictions with the exception of Russia and China and in accordance with the principle of risk diversification.

No guarantee can be given that the Sub-Fund's objective will be reached.

The policy and strategy used to pursue the investment objective is to invest mainly (at least 51%) in US/EU listed equities in security/defense sectors. Any company being considered as an investment must have a publicly available code of conduct and ethics that addresses legal responsibilities and ethics and that explicitly lists how it complies with international laws.

The Sub-Fund adheres to a policy statement for target company screening and exposure to controversial investments with an indiscriminate and long-term humanitarian impact on society. International conventions/treaties ratified by NATO and OECD member nations determine the Fund's policy.

The Sub-Fund may temporarily hold up to 49% of its net Fund assets in cash and cash equivalents and invest in similar assets.

The Sub-Fund may use derivatives, certificates with embedded derivative components (discount, bonus, leverage, knock-out certificates, etc.) and other techniques and instruments for hedging and efficient portfolio management, for maturity or risk management of the portfolio or to generate income, i.e. for speculative purposes. In case such transactions relate to the use of derivatives, then the terms and limits must comply with the investment limits.

This Class is cumulative. Dividend distributions are not planned.

The return of the product is determined by using the net asset value calculated by the Central Administration. This return depends mainly on the market value fluctuations of the underlying investments.

The Sub-Fund's assets are segregated from assets of other Sub-Funds of the Fund. The assets of the Sub-Fund cannot be used to pay debts of other Sub-Funds.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.

INTENDED RETAIL INVESTORS

The product is reserved for professional investors. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		5 years SEK 100 000		
		If you exit after 1 year	If you exit after 5 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

Unfavourable scenario	What you might get back after costs Average return each year	SEK 87 200 -12.8%	SEK 102 500 0.5%	This type of scenario occurred for an investment in the proxy between March 2015 and March 2020.
Moderate scenario	What you might get back after costs Average return each year	SEK 110 200 10.2%	SEK 143 400 7.5%	This type of scenario occurred for an investment in the proxy between August 2015 and August 2020.
Favourable scenario	What you might get back after costs Average return each year	SEK 153 200 53.2%	SEK 192 300 14.0%	This type of scenario occurred for an investment in the proxy then the product between March 2017 and March 2022.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if BIL Manage Invest S.A. is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with RBC Investor Services Bank S.A. and are segregated from the assets of other Sub-Funds of the SICAV. The assets of the Fund cannot be used to pay the debts of other Sub-Funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- SEK 100 000 is invested

Investment of SEK 100 000	If you exit after 1 year	If you exit after 5 years
Total costs	SEK 2 699	SEK 18 936
Annual cost impact (*)	2.7%	2.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.2% before costs and 7.5% after costs.
